

Claim Amendments

Claims 1-20 (canceled)

Claim 21 (previously presented): A method for treating cancer cells in a patient comprising the steps of:

introducing an increased level of labeled antibodies against alphafetoprotein in relation to normal non-malignant individuals into the patient; and

reacting the labeled antibodies against alphafetoprotein with alphafetoprotein receptor or alphafetoprotein receptor binding sites on the alphafetoprotein receptor for the labeled antibody of cancer cells from the group consisting of ovary, uterus, rectum, brain, liver, blood, serum and bone of the patient to inhibit growth of the cancer cells or kill the cancer cells.

Claim 22 (previously presented): A method as described in Claim 21 wherein the introducing step includes the step of injecting the labeled antibodies into the patient.

Claim 23 (previously presented): A method as described in Claim 22 wherein the injecting step includes the step of injecting through an IV into the patient's blood stream the labeled antibodies.

Claim 24 (previously presented): A method as described in Claim 22 wherein the injecting step includes the step of injecting the labeled antibodies into the patient at a location in proximity to the cancer cells.

Claims 25-39 (canceled)
